monthly review of business statistics

AUGUST 1971

Commonwealth Bureau of Census and Statistics, Canberra, Australia

No. 405

monthly review of business statistics

AUGUST 1971

Prepared under instructions from the Honourable the Treasurer

by **J. P. O'NEILL,** *Acting Commonwealth Statistician*

Commonwealth Bureau of Census and Statistics Canberra, Australia

Reference No. 1.4

SYMBOLS AND USAGES

The following symbols, where shown in columns of figures or elsewhere in tables mean—

n.a.	**Not available.**
. .	**Nil or less than half the final digit shown, or not applicable.**
p	**Preliminary—figure or series subject to revision.**
r	**Figure or series revised since previous issue.**
——	**Break in continuity of series (where drawn across a column between two consecutive figures).**

A blank space in a column of figures means that the figure concerned is not yet available.

Yearly periods shown as, e.g., 1970, refer to the year ended 31 December 1970; those shown as, e.g., 1969-70, refer to the year ended 30 June 1970.

Any discrepancies between totals and sums of components in tables are due to rounding.

Values are shown in Australian dollars ($) or cents (c).

SEASONALLY ADJUSTED INDICATORS

In the Contents, page one, page numbers of series containing seasonally adjusted indicators are marked with asterisks.

Details of the methods used in seasonally adjusting these and other series are given in *Seasonally Adjusted Indicators 1971*, **issued by this Bureau in July 1971, which contains original and seasonally adjusted data in tabular and graphical form for one hundred and two selected series. The seasonally adjusted indicators included therein are up-dated in relevant monthly and quarterly publications of this Bureau.**

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Review have been adjusted for the effects of some calendar irregularities, namely: 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of moveable holidays, i.e., Easter and Australia Day. The adjustments made to each series are indicated in Appendix B of *Seasonally Adjusted Indicators 1971*.

For explanatory matter on seasonal adjustment of National Accounts *see* **the supplement to the March Quarter 1969 issue of** *Quarterly Estimates of National Income and Expenditure.*

GRAPHS

The *Digest of Current Economic Statistics*, **published monthly by this Bureau, contains in tabular and graphical form a selection of the more important series included in this publication.**

(*a*) Excludes particulars of full-blood Aborigines prior to 1 January 1967. (*b*) Excess of births registered over deaths registered. (*c*) Excess of recorded overseas arrivals over recorded overseas departures. (*d*) Increase consists of natural increase, net overseas migration gain and an adjustment to make the series of increases agree with the total intercensal increase revealed by successive censuses. (*e*) Population at Census date. The difference between the statistics as here published and those shown in Census publications, which exclude full-blood Aborigines, cannot be taken as reliable statistics of the full-blood Aboriginal population.

Note. Minus sign (—) denotes an excess of departures over arrivals.

OVERSEAS ARRIVALS AND DEPARTURES

Permanent movement—persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad.

Long-term movement—arrival of visitors and temporary departure of residents with the stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more and the departure of visitors and return of Australian residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

Short-term movement—all other overseas arrivals and departures, including those of Australian troops irrespective of period of stay and U.S. troops visiting Australia on rest and recreation leave. The latter are classified for statistical purposes as short-term visitors.

Crew members, persons passing through Australia on board the same ship or on the same flight (variously called direct transit passengers or 'through' passengers) and passengers on short pleasure cruises commencing and finishing in Australia on ships not then engaged in regular voyages, are excluded from these statistics.

(a) The figures in this table, except those relating to Government employees, are based on comprehensive data from the Population Census of June 1966. For the period subsequent to the census the employment data are obtained from three main sources, namely (i) current pay-roll tax returns, (ii) current returns from Government bodies, and (iii) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. Month-to-month changes shown by current returns are linked with the benchmark data to derive the monthly estimates. At June 1966 recorded employment obtained from the foregoing sources accounted for about 85 per cent of the total number of employees in the industries covered, as determined by the census. (b) Includes law and order; religion and social welfare; health services; education; and other community and business services. (c) Includes forestry, fishing and trapping; mining and quarrying; electricity, gas, water and sanitary services; and communication. (d) Affected by industrial disputes.

VALUE OF RETAIL SALES(*a*): COMMODITY GROUPS*

Figures are on a basis comparable with the 1961–62 Retail Census. The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainment, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the year 1961–62 are derived from a census taken in respect of that year, whereas other figures are estimates made by means of sample surveys.

VALUE OF RETAIL SALES(*a*): COMMODITY GROUPS

Figures are on a basis comparable with the 1961–62 Retail Census. The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainment, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the year 1961–62 are derived from a census taken in respect of that year, whereas other figures are estimates made by means of sample surveys.

WHOLESALE TRADE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, goods sold by wholesale in Australia including imports are taxable. The returns do not relate to all wholesale trades as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

(*a*) Owing to insufficient information it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles and all such machinery is treated as capital equipment whether imported in an assembled or unassembled condition. (*b*) Includes replacement parts, completely knocked-down vehicles and components for the assembly of motor vehicles. (*c*) Excludes a percentage of piece-goods to be sold by retail and paper to be used solely for wrapping which are recorded in classes VI. E J and III. respectively. (*d*) Excludes crude petroleum which is included in class I. C. (1-4). (*e*) Includes a percentage for paper used solely for wrapping. *see* note (*c*).

EXPORT PRICE INDEX

The table below sets out Export Price Index numbers on the reference base: Year 1959–60 = 100. Figures since June 1969 have been compiled on an interim basis which incorporates a re-weighting (on a 1969–70 basis) of the items contained in the previous series and the inclusion of some additional items. A comprehensive review and rebasing of the index is expected to be completed later this year. The interim series have been linked to the previous series at June 1969.

A detailed description of the index as constructed up to June 1969 is given in Commonwealth Year Book No. 56, 1970 (pages 240–242). The interim series was introduced in the July 1970 issue of bulletin reference number 9.2.

(*a*) Comprises coal, iron and steel, copper, zinc, lead and silver. Does not include iron ore, bauxite, alumina and mineral sands which, however, have been included in the 'All groups' index from July 1969 on. (*b*) Interim series linked as at June 1969. (*c*) Interim series includes, in addition to the specified groups, the four items iron ore, bauxite, alumina and mineral sands.

INDEXES OF VALUES OF EXPORTS AND IMPORTS AT CONSTANT PRICES

The tables below present quarterly and annual indexes of the values of Australian exports and imports of merchandise at average 1966–67 prices. A description of these measures is given in the first issue of the bulletin *Exports and Imports of Merchandise at Constant Prices* (Ref. No. 8.21) published on 10 October 1968.

(*a*) The series shown for years prior to 1966–67 are not strictly comparable to the series shown from 1966–67 onwards (*see* the bulletin referred to at the head of this page). (*b*) These percentages may be used in analysing the contribution of each group to movements in the total index. (*c*) Imports in February and March 1969 were affected by industrial disputes in ports on the East Coast of U.S.A. and Canada. (*d*) Includes one submarine, three civilian aircraft and eighteen Phantom F-4E aircraft valued at $64.5 million at current prices. (*e*) Includes six Phantom F-4E aircraft valued at $13.6 million at current prices.

WHOLESALE PRICE INDEX OF MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING

A detailed description of the index is contained in Labour Report No. 54, 1968 and 1969.
The separate city indexes shown below measure price movements within each city individually. They do not compare price levels as between cities.

(*a*) Figures are shown to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number. (*b*) The whole of the group Electrical installation materials and the majority of the items in the group Mechanical services components are based on Sydney and Melbourne price series. (*c*) The indicator used for this group is the Wholesale Price Index of Electrical Installation Materials.

WHOLESALE PRICE INDEX OF MATERIALS USED IN HOUSE BUILDING

A detailed description of the index is contained in statistical bulletin Ref. No. 9.9 of 27 November 1970. Copies are available on request. The separate city indexes shown below measure price movements within each city individually They do not compare price levels as between cities.

CONSUMER PRICE INDEXES: VARIOUS COUNTRIES

(Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations.)

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

The items priced and the levels at which they are priced in these indexes vary widely according to the intended purposes of the indexes of the various countries. A short dash on each side of an index number (e.g. –101–) indicates that the two series have been linked at that period.

SHARE PRICE INDEX

This index relates to ordinary shares of the principal companies (excluding banks) listed on the Sydney Stock Exchange, and whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per $2 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. The total index is the average of all the shares included in the groups with the addition of thirty-four miscellaneous shares.

(*a*) In addition to award rates of pay, includes earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (*b*) Total wages and salaries, etc., divided by the total number of civilian employees expressed in male units, i.e., total male employees plus 55 per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. (*c*) Includes the Australian Capital Territory. (*d*) Includes the Northern Territory. (*e*) All industries—Australia base 1953–54 = 100. There has been no change in the basis of seasonal adjustment of this series. It has not yet been adjusted by the programmes used for other Bureau series.

Note. Quarterly figures shown in money terms are affected by seasonal influences. Special payments, including prepayment for holiday periods, tend to raise the December quarter and to depress the March quarter averages. In addition, figures for all quarters may be affected by the changing incidence of pay-days. Allowance for these influences has been made in the calculation of the seasonally adjusted index.

CAPITAL EXPENDITURE BY PRIVATE BUSINESSES

These statistics are designed primarily to measure trends in expenditure by private businessess on fixed tangible assets. The statistics are based on returns obtained from private businesses subject to pay-roll tax (other than businesses in rural, professional, gas and electricity industries), from government banks and airlines, and from other businesses not subject to pay-roll tax which undertake projects of more than $500,000 in any half year. For statistics of capital expenditure by all private businesses, *see* the series 'Gross Fixed Capital Expenditure' on page 60 of this publication.

(*a*) Quantities shown are metallic contents of mine products based on chemical assay. (*b*) Western Australian gold production figures (in respect of major producers) normally relate to a four-week period ending in the calendar month indicated. However, two such periods ended in each of the calendar months April 1969, March 1970 and March 1971. (*c*) Quantities shown are gross output.

(a) Finished and partly finished motor vehicles. (b) Includes buses and ambulances. (c) First hand receivals as recorded by the National Council of Wool Selling Brokers. (d) Average price which a New South Wales clip of constant average quality would realise if sold at the level of prices obtaining in the specified month. Annual prices are averages of monthly prices weighted by quantity of greasy wool sold in month in New South Wales. (e) Prior to July 1963 the series represent the production of bodies assembled from local and imported panels. (f) *Source* (from July 1968): Australian Rubber Manufacturers Association Limited.

INDUSTRIAL PRODUCTION INDEXES: VARIOUS COUNTRIES

(Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations)

Unless otherwise stated, the indexes shown below include mining, manufacturing, electricity and manufactured gas but exclude construction. When the indexes are adjusted for differences in the number of working days per month or for seasonal variations they are footnoted accordingly. A short dash on each side of an index number (e.g.,–118–) indicates that two series have been linked at that period

(Base of each index: Year 1963=100)

RAILWAYS AND SHIPPING

Part of the shipping cargo is recorded in tons weight and part in tons measurement. As the total cannot be stated accurately as either tons weight or tons measurement, each is recorded and published separately; 1 'ton measurement' equals 40 cubic feet.

(a) Combined broadcast listeners' and television viewers' licences commenced 1 April 1965 and are issued to persons owning both television and broadcast receivers at the same address. New issues of combined licences may include renewal licences of either type. (b) Demand for telephone services, allowing for applications withdrawn during period. (c) Includes new issues to persons whose previous licence had expired; these may increase significantly in certain months due to special licence inspection campaigns of the P.M.G.'s Department. (d) Monthly average. (e) From March 1962, excludes short-term hirers' licences which were previously included. (f) Monthly total

NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

The following statistics show the net amount of cash transferred from the investing public to companies in Australia through the types of capital specified. The definition of new money has been changed as from September quarter 1970 (*see* 'New Capital Raisings by Companies in Australia', Ref. No. 5.9, published on 31 May 1971). The statistics do not include changes in bank overdraft, loans to authorised dealers in the short-term money market, or deposits accepted by banks, insurance companies, pastoral companies or building societies.

FINANCE COMPANIES

The following series of statistics cover the main types of lending by finance companies in Australia, including instalment credit for retail sales, wholesale finance, other consumer and commercial loans (comprising personal loans, mortgage loans and advances), factoring, leasing and bills of exchange. Information on the scope of these statistics and the definition of items are included in the bulletin *Finance Companies, 1969–70* (Ref. No. 5. 13), which in addition contains more detailed statistics. Supplementary classifications are also provided for the instalment credit for retail sales transactions of finance companies. Amount financed is classified by type of commodity and collections and other liquidations is divided between cash collections and other liquidations.

(*a*) Figures for New South Wales represent combined transactions of consolidated revenue fund and business undertakings—railways, omnibuses and Harbour Services section of Maritime Services Board—included in annual Budget Papers. New South Wales monthly figures have also been adjusted to exclude debt charges recouped by business undertakings outside the budget. Adjustments have been made to exclude duplications. (*b*) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payment to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State consolidated revenue funds of States grants (financial assistance), the interest on State debts, special grants, special financial assistance, grants to universities, tuberculosis capital expenditure and national welfare fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
